

# LP VISUALIZER CHEAT SHEET

Tips and tricks for  
operating the LP Building  
Solutions® Visualizer  
program through K&K  
Industries

**1. Go to [www.kktruss.net](http://www.kktruss.net)  
or scan QR code below**

**2. Choose "visualize your  
project" and click on  
"Exterior Visualizer"  
or scan QR code**

If you need a reminder on how to use  
the program, see the program tutorial.

**3. Choose "select a home  
style" or "custom design"**

If choosing "custom design", see a K&K  
sales rep about payment, courtesy of  
K&K Industries.

Be sure to upload photos individually

**4. Choose a home**

If using the custom program, links  
with your home images will be  
emailed to you in 2-5 business days.

**5. Choose from the top 3  
tabs**

- walls
- trim & fascia
- roof, doors & more

**6. Choose surfaces by  
selecting the eye icon  
and then clicking on the  
corresponding words**

Clicking the icon will light up the area  
that corresponds with the word  
description next to it.

**7. Choose your type, style,  
and color**

You may decide to use the  
"recommended color set" tab

Choose "create your own" when picking  
colors to see additional options

**8. Click 'compare' on the  
image once one version is  
complete**

Drag slider to one side to create  
another house following steps 5-7. Click  
compare again to compare versions,  
dragging the slider. Download to save.

# SW VISUALIZER CHEAT SHEET

Tips and tricks for  
operating the Sherwin  
Williams® Visualizer  
program through K&K  
Industries

**1. Go to [www.kktruss.net](http://www.kktruss.net)  
or scan QR code below**

**2. Choose "visualize your  
project" and click on  
"Interior Visualizer with  
Full Color Selection"  
or scan QR code**

**3. Choose visualizer  
based on device**

If using a computer, skip this step. If changing to phone or iPad, click "try on colors", then choose device in the left menu. Follow download instructions. App will require using your own space (skip step 4).

**4. Choose "use our  
photo"**

K&K recommends using the default scenes for this program.

**5. Add colors to bottom  
pallet**

To add, click the '+' button on the color sample.

To see color pallet suggestions, select the color pallet on the color sample.

See the name and color code of each color through our partner, Sherwin Williams®.

**6. Select color, then  
select surfaces to paint**

Hint: press "close" in the top right corner of the visualizer when in program extensions to go back to your current photo design.

**7. Toggle day/night-time  
options**

Some default scenes allow users to view their scene in both day and night lighting!

**8. Press "clear areas" or  
"more scenes" to start  
over with a new design**

If you need a reminder on how to use the program, see the program tutorial. Download to save.
